EDUCATION

Northeastern University Sep 2023 – May 2026
M.S. in Computer Science, GPA 3.8/4.0 *Seattle, WA*
Coursework: Machine Learning, System Design, Distributed Systems, Database Systems, Web Development, Algorithms

EXPERIENCE

TikTok — Global E-Commerce (TikTok Shop) Sep 2025 – Jan 2026
Software Engineer Intern *Bellevue, WA*

- Delivered **creator-facing campaign and data experiences for 430K+ creators across 10+ regions**, translating product requirements and Figma designs into production React/TypeScript workflows backed by high-traffic Go services and versioned Protocol Buffers contracts.
- **Improved Figma-to-code consistency during a major BFCM launch** by reconciling mismatched color tokens, publishing a shared token mapping, and aligning designers and engineers on the standard.
- Designed a **configuration-driven client architecture** for regional lifecycle stages, content, routing, and user segments with schema validation, fallback handling, feature flags, and localization, **enabling new-market experiences to ship through configuration**.
- Partnered with product and backend teams to align field structures, naming, validation, and reusable component boundaries, **reducing frontend integration defects by ~40%** across multi-region releases.
- Built a responsive Swiper.js carousel with targeted content, pagination, click tracking, and localized conditional rendering, **increasing banner click-through rate by ~25%**.

Inspur — OpenAtom Foundation farris-vue Jun 2025 – Aug 2025
Frontend Software Engineer Intern | Top 10 Contributor *Remote*

- Translated Figma flows and interaction specifications into **reusable Vue 3/TypeScript components for an AI-agent workflow editor**, connecting design intent to working drag-and-drop nodes, edges, and dynamic property panels.
- Architected a **schema-driven workflow designer** with SVG and JSON Schema, supporting configurable DAG execution, reusable tool and node composition, and metadata-defined configuration for **10+ agent node types**.
- Modularized graph rendering, edge routing, state management, and property editing; scoped updates to affected graph elements and **improved interaction responsiveness by ~2x** on workflows with 50+ nodes.

SELECTED PROJECTS

CodeAgent — Multi-Agent Design, Context & Evaluation Platform *TypeScript, Bun, MCP*
OpenAtom Open Source Competition First Prize | Gitee GVP | WIC 2026 Wuzhen Open Source Challenge MVC Award

- Authored the **workbench design system and visual style guide**, then **exposed its schemas, templates, and component examples through MCP** so coding agents reused governed tokens and patterns instead of ad-hoc styles; prototyped home, inbox, and login flows as interactive HTML.
- Built a TypeScript/Bun platform **coordinating six domain coding agents** using Claude Code, Codex, and Cursor, reviewing and refining agent-generated code and UI before merge.
- Built the **MCP tool layer** for code search, file updates, and validation across **five integrated coding engines**; added CI quality gates on a ~5,600-file repository.
- Created a semantic YAML DSL and deterministic compiler that **cut configuration size by more than 90%** while supporting schema validation, automated diagnosis and repair, reverse compilation, and incremental editing.

Loopy — AI Chat App *SwiftUI, TypeScript, AWS*

- Built a **SwiftUI mobile client and serverless TypeScript backend for multi-turn AI conversations**, aligning shared conversation states and interaction behavior across the client, Lambda APIs, and DynamoDB persistence.

SKILLS

Design Engineering: Figma, Design Systems and Tokens, Figma-to-Code, Interactive Prototyping, Schema-Driven UI, Reusable Components, Responsive Design, SVG, DAG Workflow Interfaces, Localization, Feature Flags

AI Coding & Workflows: Claude Code, Codex, Cursor, OpenCode, Coding Agents, Agentic Workflows, MCP, Tool Calling, RAG/CAG, Context Engineering, Prompt Engineering, Structured Outputs, LLM Evaluation, JSON Schema

Languages & Stack: TypeScript/JavaScript, React, Vue 3, SolidJS, SwiftUI, HTML5, CSS3, Tailwind CSS, Node.js/Bun, Python, REST APIs, GitHub Actions
